Census 2000: Partnership and 1999 Address List Review

The Address List Forms The Very Foundation Of Census 2000!

A Census 2000 questionnaire will be delivered to all residential living quarters on the Census address list. Although new living quarters/addresses can be added during the census, ***the best assurance for a successful Census 2000 is to start with the most complete and accurate Census address list possible.***

Partner With The Census Bureau To Review The Address List

Local and tribal governments can form partnerships with the Census Bureau to review the address list, or make arrangements with another organization — such as their local council of governments, metropolitan planning organization, county planning agency or state data center — to do the review. Just say “YES!” The Address List Review process (previously called the “Local Update of Census Addresses” program) will begin soon for areas in which most mail is not delivered using house number and street name addresses. Just call the partnership or geography staff for your state at the number listed on the reverse side to sign up.

Pick Your Format

The Census Bureau can deliver the census block housing unit tallies, address list, and maps for your jurisdiction in a variety of formats — CD-ROM, diskette, or paper printout. Just let us know what you want.

Review In The Manner You Choose

Some jurisdictions with their own computer-readable files of addresses and maps will want to perform a computer match to assign their addresses to Census 2000 block numbers, tally the number of addresses in each block, and then compare the results with our tallies. Other jurisdictions will want to use their local knowledge about newly constructed residential areas to make sure that the correct number of new addresses is included in each block and that all new streets are on the maps. Regardless of the manner chosen, the address list itself must be kept confidential.

Tell Us What You Learn

The goal is to provide the Census Bureau with the list of blocks that are missing addresses or that have too many addresses or that have map errors. The Census Bureau will field check its address list for these blocks.

Census 2000 Can Help

The Census Bureau can help you decide the best approach for your needs. In addition, the Bureau offers training and other technical assistance. Just contact the Regional Census Center for your area.
